Lancaster Farming

VOL. 6, NO. 48 | Lancaster Farming, Saturday, October 21, 1961 | $2 Per Year

HANDLING OF CORN IS CUT TO A MINIMUM with the set up on the Zeigler Hess farm at Quarryville R3 Shelled corn from the picker-sheller is hauled from the field in a dump truck. It flows by gravity into a pit and is elevated by auger to a holding bin over a batch drier. Talking over the operation are, left to right, Hess, William Fredd, teacher of vocational agriculture at Solanco, and Henry Hess, son of Zeigler. Fredd is working with Hess on corn growing and yield checking. —L. F. Photo

Yield Shows Value Of Wheeltrack Planted Corn

"We will definitely plant our corn in the wheeltrack next year." Zeigler Hess, a Quarryville R3 poultryman said this week after analyzing his success with the method this year.

With a good portion of his corn crop harvested with a picker-sheller and dried with hot air to about 12 per cent moisture, Hess is in a position to look at his experiment and compare it with the conventional way he grew corn for years.

A series of events beginning last winter makes the statement of Hess a significant one. During the winter, Hess served on a panel of corn growers at a meeting of the Solanco Young Farmers Association At that meeting, another panel member reported on the success of several "Wheeltrack" plantings of corn in the county.

At that meeting Hess explained that he had always tried to cultivate his corn several times during the year, but he added, "Maybe we have been going about it all wrong. I guess we are never too old to learn something new in this business of farming"

Deciding to to try the minimum tillage system, but not ready to go all the way, Hess "plowed and planted" some of his 70

Poultrymen Tell Board To Move To Ag Center

Members of the Lancaster County Poultry Association gave their board of directors a vote of confidence Thursday night when the members voted to back the board in a proposed move to the planned Agriculture Center.

The decision came in the wake of a two hour discussion which ran the gamut of arguments for and against such a move.

After a 29 to 2 paper ballot vote approving a proposal by the directors to move the facilities of the Poultry Center at 340 W. Roseville Road to the proposed Agriculture Center on the opposite side of the Rt. 230 Bypass, the membership passed a resolution confirming the power of the board to act for the membership.

The resolution as passed was, That the board of directors be authorized to complete all negotiations for the move to the Agriculture Center. "All negotiations", the secretary, Charles Warfel explained, "Includes the collection of land damages from the state when approximately .8 of an acre of land belonging to the Poultry Association will be used for construction of the proposed east-west bypass, the disposal of the present building when the Agriculture Center is completed, and dispersal of any funds remaining after

Fulton Grange Elects McSparran

Charles G. McSparran was elected Master of Fulton Grange 66 at a recent meeting in the Grange Hall.

Other officers elected included Gyles Brown, Overseer; Marie M. Murphy, lecturer; Ambrose Giffing, Steward; Clair Murphy, assistant steward; Maurice Gregg, chaplain; Walter Wood, treasurer; Mrs. Laura B. McSparran, secretary; George Lamborn, gatekeeper; Cathy Gilbert, Ceres; Betsy Sinclair, Pomona; Geraldine Arrowsmith, Flora; Mary Lou Wesley, lady assistant steward; Robert Reed, executive committee; Thomas Galbreath, finance committee Maurice Gregg and Philip Grifling, trustees; Anna Armstrong and Mary Giffing, flower committee; Lila Gregg, pianist; Charles G. McSparran, purchasing agent; Dorothy Walton, hospitalization, and Mrs. Ann Giffing, juvenile matron.

Installation of the new officers will take place Oct. 23 when Fernwood Grange, Chester County will be in charge Norman Maule will be installing officer.

To Pick Corn Variety Plots

The Lancaster County Agricultural Extension Service corn variety plots, called by a Penn State corn researcher, "the most significant corn trials in the state" will be harvested next week, assistant county agent, Arnold Lueck said this week.

The plots, begun by former county agent Floyd (Dutch Bucher and continued for many years by former associate county agent, Harry S. Sloat, originally contained many open-pollinated varieties of corn. The two plots in the 1961 season include 30 varieties, some new and some established varieties, but they are all hybrids.

Originally the plots tested varieties as well as population differences, but the current plots were all planted at the 18,000 plants per acre rate since research has shown this to be the most ideal thickness for stands in the county.

Farmers of the county are invited to inspect the varieties for differences in adaptability, yield, soil type, ear placement, length of season,

Farmers and C.D. To Be Subject Of Meeting

A meeting of vital interest to farmers of Martic and Providence Twps. has been scheduled for next Tuesday, October 24 at 8 p.m., according to Colnonel John Kenderdine, Deputy Director of Civil Defense in Martic Twp. The meeting will be held in the Rawlinsville fire hall.

Dr. George L. Smith, veterinarian of the Pennsylvania Department of Agriculture, stationed at the Lancaster Stockyards, will address the meeting on the subject, 'The Danger to the Farmer and What Can Be Done About It".

Richard Hoover of the Lancaster office of the Farmers Home Administration will also be on the program. Subjects under discussion will include: What can be done before an enemy attack to minimize the effects of radiation and other potential hazards?; What can be done after the attack?; Will farm land be usable after an attack?, and will dairy products be marketable? Questions from the floor will be welcomed, Colonel Kenderdine said.

The program will begin with brief reports from the township C D. directors, Norman Wiggins and William Goodman, and a brief analysis of the present situation by Col Kenderdine.

All farmers in Martic and Providence Townships, as well as surrounding areas, are invited to attend

Farm Calendar

Oct. 20—7 p.m. - Meeting of the Lancaster County Farm Equipment Dealers Association at Kauffman's Tea Room, East Petersburg

State Grange Announces Annual Meeting

The 89th annual convention of the Penn State Grange will be held in Washington, Pa. next week, Monday, October 23rd through Thursday, October 26th, according to information received this week from J Collins McSparran, Master of the State Grange.

At this convention representatives of the 73,500 members of the 56 Pomona and 685 Subordinate Granges will hear reports of Pennsylvania Grange activities for the past year, elect members to the Executive and Finance Committees, and adopt policy positions for the coming year, McSparran said.

Awards for the 1961 Pennsylvania State Grange Community Service Contest will be presented, along with numerous other awards for Grange activities during the past year. A Youth Conference will be held Wednesday afternoon, Oct. 25.

Seventh Annual Feeder Calf Sale Is Next Week

October 27 has been announced as the date of the seventh annual feeder calf sale at the Lancaster Union Stockyards. Sale is scheduled to begin at 1 p.m.

Grading and grouping of the calves is scheduled to be done on the previous day with County Agent M M. Smith and Arthur McArthur representing the breeders & consignors, and William McCoy representing the Lancaster Livestock Exchange

(Turn to page 5)

4-H Honey Club Has Roundup

A 14 year old Lititz R2 beekeeper finished his third year in the county 4-H bee club by taking grand prize in the project contest at the club roundup Thursday night at the honey house of Ralph Gamber, 910 State Street, Lancaster.

Daniel Hershey, son of Mr. and Mrs Elwood Hershey scored a total of 92 out of a possible 100 points. Wilma Wenger, 76 Greenfield Road, Lancaster was runner-up in the contest, which considered the honey exhibit as well as the project book, with a score of 91

Judge William Clarke, Extension Beekeeping Specialist from Pennsylvania State University made the follow-

(Turn to Page 5)

FIVE - DAY WEATHER FORECAST

Saturday - Wednesday

Near normal temperatures are expected during the next five days with quite a bit of day .to .day variation. Cooler temperatures Saturday are expected to give way to warming Sunday. Cooler again on Monday and warming again through Wednesday. Normals for the week range from 43 at night to 63 in the afternoon. Precipitation during the period may total ½ inch or more falling mainly as showers part of Saturday in most areas and again on Monday.

New Holland

Heavies, Low Grades Down

Heavy weight steers and lower grades moved downward under some pressure at the October 19 auction at New Holland. Compared with last week's market, slaughter steers grading choice and prime were fully steady while lower grades and weights over 1,300 lbs. were 25 to 50 lower Cows were 50 higher, and bulls were steady.

High choice and prime 950 to 1,250 pound slaughter steers brought 25 85 to 26.50 with several lots to 26.60 and 26.75. The bulk of the choice steers were 24 50 to 25 75 Good to low choice made 22-24 50 with 1,300 to 1,450 pounders at 21 50 to 24 Standard sold at 20.50-22.

A few lots of good and choice 800-1,075 pound heifers brought 21 10 to 24 25.

Cutter and utility cows were 15 25 to 16 50 with canners and low cutters 13-75-15 50 Shelly canners were down to 11

Utility and commercial bulls brought 19 to 22 Good grade bulls sold up to 23 50.

A few lots of medium and good 592-742 pound stock steers sold for 20.75 to 23 50 Good and low choice 800 to 1,060 pound feeder steers brought 20 85 to 23 10

Calves 390 Vealers were steady to weak with good and choice veal calves bringing 28 to 34 and choice and prime at 34-37.50 Standard and low good were 24-28 Utility 21 25.

The 278 horses, ponies and mules at the October 16 sale continued on a steady market as pony mares brought $90-150 while geldings made $45-110. Riding horses made $110-190 while driving horses ranged $100-210 Killers were 7½-8 cents.

At the October 18 sale of dairy cattle, 208 cows, 23 heifers and four bulls changed hands at about steady prices

Fresh Holstein cows sold $300-480 while Guernseys made $190-240 and other breeds $185-265. Stock heifers were $60-160 and stock bulls ranged $110-205

SHEEP 22 Not enough of any one class on sale to establish a market.

There are about 17 5 million milk cows in the United States, reports the National Dairy Council. With current estimated human population at 180,000,000 that's about one cow for a little more than 10 people The trend is toward fewer cows, but more milk per cow, NDC points out.

Lanc Poultry Center

Broilers Continue Climb

Broilers continued to gain some ground at the Poultry Center this week as 53,000 head in 14 lots changed hands at prices ranging from 14 8 to 15.3 for a sale average of 14 96. The average at the October 19 auction was the highest sale average since Sept. 23 when broilers made a 15 23 average. Broilers at the corresponding sale a year ago brought a 17 09 average.

One lot of 900 pullet roasters brought 20.6 while five lots of cockerel roasters including 3,725 head changed hands at 20.5 to 21.7. Three lots of 5,100 leghorn fowl sold for 8 5 to 8 7. One ot of 1,150 heavy fowl made 13.2 and 100 males brought 7 2.

The complete auction offered and sold 63,975 head in 25 lots The sale marked the first time since May 13 that all birds on offer were sold.

Following is the complete sale with lot number, seller, grower in parenthesis, amount and breed, age in weeks and days, buyer and price.

Code: WV-White Vantress, C-Cockerels, P-Pullets, L-F-Y-Leghorn Fowl Yearlings, HF-Heavy Fowl, W-Mts -White Mountains.

Delmarva-Georgia

Broilers Gain About One Cent

Delmarva reported prices were approximately one cent higher during the 24 hour period ending 10:30 Friday morning. Prices of 13 to 15 on 695,800 head were reported.

Supplies were moderate to short of the increased demand. With most of the eastern shore processors not operating today the estimated slaughter for the week end was 835,900 head compared with 949,000 head last weekend.

The Delmarva broiler-feed ratio for the week ending on October 13 was 2.9 as broilers averaged 12 88 per pound and 20% mash cost the grower $88 95 per ton. The ratio for the corresponding week a year ago was 3.8 when broilers averaged 16.50 and mash cost $86.80 per ton.

CHICKEN FOR DINNER

Broiler-fryers are a featured item in the meat departments just about everywhere these days. Catherine Love, Penn State extension consumer economics specialist, says the young birds are amazingly economical, excellent eating, attractive in appearance, and a top value in the meat-type foods. Supplies are plentiful and prices for broiler-fryers are now at an all-time low.

Ghosts To Walk At Keener Farm

Ghosts and goblins will walk tonight on the farm of Clarence Keener, Manheim R3.

From 7 p.m. to about 8:30 4-H club members, aged 9 to 13, from all parts of the county will parade for prizes in a costume contest.

After 8:30 and the junior ghosts and gobblins have had their fling, the teenagers will begin the merriment with a square dance which will be open to all club members in the county.

The party is an annual affair sponsored by the county 4-H Council.

FROM WHERE WE STAND -

The Land Of Neither Town Nor Country

Suburbia has been defined as that area, neither town nor country with the problems of both and the conveniences of neither.

Lancaster County is fast becoming a vast suburban jumble with good poscibilities of becoming an area with all the problems of both the town and country and with few of the conveniences of either.

If this sounds like a pessimistic statement, we challenge you to drive with us around the county to see some of the recently-developed residential areas where little or no planning preceeded the laying out of building lots. We challenge you to drive to some of the areas which were open farm lands just a few short years ago and see the deplorable conditions of streets, curbs, lawns and buildings of the so-called "economy developments". We challenge you to follow some of the driveways with hidden intersections and dead ends with no space to turn around when you have discovered there is no outlet from that street.

We challenge you to talk with some of the farmers in areas where neighbors have sold to developers. We suggest you ask them what has happened to the country atmosphere of their community after 50 or 100 families moved into the space where a herd of cows grazed less than a dozen years ago.

We challenge you to seek out the farmer in an area of housing developments and ask him how his taxes have been effected And while you are about it, ask him what extra benefits came to his property because of the rise in taxation.

But then we think you should ask the non-farm resident of suburbia how he feels about the whole thing. Perhaps you will learn, as we did, that many of them are dissolusioned about "life in the country". Many a city resident moved to suburbia to be away from the annoyances of city life but all too often he took those annoyances right along with him.

This is not to say that all city residents who moved to the suburbs are malcontents or trouble makers, but in many cases, people reared in town find life more than walking distance from a shopping center a frustrating experience.

Many young couples move to surburbia with the idea that it is a better place than the city to bring up children. But too often they find the schools totally inadequate in size, facilities and personnel to handle the rapidly-expanding enrollment. They find the recreational facilities they took for granted in town are non existant. Children of non-farm rural residents have no outlet for their energies such as those built into every family farm operation. Recreational facilities and programs become a necessity in areas of large numbers of rural non-farm residents, and the farmer must be prepared to pay his share of the cost of furnishing such facilities.

As an area becomes more and more urbanized, the demand for utilities, services and streets grows. The balance of power swings from the farmer to the newer arrivals and the city-bred property owner begins thinking in terms of bringing the conveniences of the city to suburbia. This is not all bad. Rural residents have for years been lagging behind their city cousins in creature comforts, but they have been catching up in the past few years with vast home modernization plans on the farms.

But when the political power is swept swiftly away from the long time residents of an area to the new residents, the situation for strife is ripe.

Farmers, independent by nature, tend to resist any zoning laws which might restrict their operations and the rural non-farm residents, eager to maintain some of the features of their former life in town, begin to think in terms of putting restrictions on any operation which might be considered objectionable.

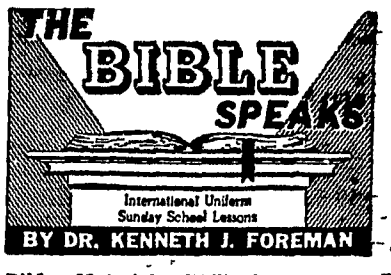
In the scramble to "do something about the situation" as soon as possible, there is a danger that municapalities will push through zoning ordinances which will not help either the farmer or the rural non-farm resident.

At present there are 12 boros and townships, in addition to the city of Lancaster, in the county with zoning ordinances. Four are actively working on plans at the present time, but there are another 47 municipalities with no zoning ordinances and presumably no plans to draft laws soon.

We would urge farmers to take the initiative in forming planning commissions within the townships so that when the time comes to draft zoning ordinances there will be some basis for the ordinances. In all too many cases zoning laws have been written with no plan for the future and very little idea of the kind of municipality that can develop under the hurriedly drawn laws.

Farmers must become informed on this vital question and they must act before they are drawn into an area which is neither town nor country, with the problems of both and the conveniences of neither.

At least that's how it looks from where we stand.



Bible Material: Philippians 2:1-18; Colossians 3:1 through 4:1
Devotional Reading: I John 4:13-21.

Being Related

Lesson for October 22, 1961

WE CAN'T help it. When we marry, we discover we have not married one single person, we are suddenly in the midst of more in-laws than perhaps we had reckoned on. But this should not surprise us. Already at birth we are related to people we never saw before and did not choose. They might not have chosen us, either, to tell the truth, if they had known how we were going to turn out! That's life. From beginning to end we are related, willy-nilly, to people we hardly know or don't know at all, as well as to people we do know and love. Being related is the inevitable human experience, along with death. The Christian way of life, at base, is simply recognizing our relatedness more and more, and living up to it.

Dr. Foreman

Being Related to Other Christians

Saint Paul, that world-famed letter-writer, never finished a letter without having something to say about a Christian's relationships. Most of the troubles in the church and in the world come from, and in turn produce, perversions, dislocations or disturbances in relationships among people. It would not solve all our problems if each of us could be shut up in a tight little cell all his life; for then we should never be **human.** But we can't live an unrelated life no matter though we tried. So what the inspired Apostle has to say about relationships is always just what we need. The world has changed in appearance since New Testament times, but the inter-relatedness of men is a more vital problem than ever.

In Phil. 2:1-18 and in Colossians 3, most of what Paul has to say is directly on the problem of the relation of Christians to other Christians It's a mistake to think that just because you are a Christian, that you will never find other Christians a problem, or that they in turn will have no problems caused by you. This writer has lived at various times in communities in which every one was a professed Christian; but personal relationships could get to some acute crises all the same. Paul found this to be true in the Christian communities (churches) to which he wrote. The most common destructive factor, often, was quarrels, sometimes over important but sometimes over trifling matters. Paul's remedy is always the same: Be like Jesus, and put yourself in the other person's place. Easier said than done? To be sure; but remembering it is the will of God, we can have good hope that he will bless our every effort to live as the family of God.

Being Related to Outsiders

Being related to outsiders presents another problem. They do not recognize us as brothers and sisters; if they did, they'd have gone a long way toward being INsiders. But how can we be related to uninterested or even hostile persons? Here we have to remember what has already been said: We are related, no matter how we botch the relationship, it's still there. The question remains, though,—if the other party wants to have no part of us; if we're dealing with people who are uncongenial, mean, not Christians by intention or in fact, persons who don't know the first syllable of brotherhood, who profess no interest in God or his people; yet who are related to us in some way or ways (as e.g. by marriage, business relations, social contacts and so forth), then what? Paul puts it into one big little word: SHINE!

Can We Grow?

What Paul means, no doubt, is that the start of Christian relations is to be a Christian first. Even if the other person is not a Christian, you can be one. Even if the world around you is dark, you can shine.

Probably there is no need to ask the question: Can we grow in our Christian relationships? That does not mean having more friends, it may have little to do with friendships. It means being more Christlike in all our relationships both with the Christians and non-Christians, with the neighbors you see every day and also the people you never actually see. Of course we can grow in this as in all that is good—if we are really alive!

Now Is The Time . . .

BY MAX SMITH

MAX SMITH

TO FEED THOSE FRESH COWS—Dairy cows have a high requirement for feed nutrients immediately after freshening; thus it is important to feed them grain before they freshen and continue them on a full-grain feeding program as soon as possible after calving. Many good dairymen feed 10 to 12 pounds of grain daily before freshening and then three days after calving the ration is gradually increased up to 20 pounds per day depending upon the size and production of the cow. High quality silage and hay in liberal amounts is also essential

TO DRENCH SHEEP—Good flock management requires at least two drenchings per year of the entire flock of sheep, one before they go to pasture in the spring and again before they are removed from pasture in the late fall These two drenchings in addition to the providing of a phenothiazine-salt mixture before them at all times and the rotating of pastures, should keep the internal parasite infection to a minimum. With the spring lambs additional drenchings are recommended during the summer months.

TO MAKE COMPLETE SOIL TESTS—Trying to produce good crop yields on low fertility soil, or on soils of unknown needs and fertility, is not one of the recommended farm practices of the sixties. The fall of the year before the ground freezes is a good time to take soil samples and have them tested at the Penn State Soil Testing Laboratory. This testing work at a cost of one dollar per sample is very worthwhile in planning for more yields at lower costs. Any one of the major soil elements such as lime, phosphorus, potash, or organic matter may reduce and prevent good yields on most any crop. A complete soil test will reveal the soil needs.

TO BE CAREFUL WITH FALL SPRAYING—The trend in forage insect control is to spray the legume fields in the fall for the control of spring insects. During this month of October many fields will be sprayed with Heptachlor and during November a greater number will be sprayed with Dieldrin. Both of these materials are toxic to farm animals if consumed before the regular forage harvest season next spring. All livestock producers are urged to be very careful and keep animals from these areas this fall and winter.

Farm Women 19 Mark Birthday

Past presidents were honored at the recent 15th anniversary celebration of Society of Farm Women 19 at the home of Mrs Richard Nolt, Manheim R1

All except one of the past presidents were present at the covered dish luncheon. The group sent flowers to Mrs. Mark Herr, Collegeville, the only past president not in attendance.

Mrs Robert White was nominated as corresponding secretary and Mrs Nolt as recording secretary Ushers at the county convention of Farm Women's societies will be Mrs John Ruhl, Mrs Vernon Newcomer, Mrs Isaac Miller, Mrs Leroy Hottenstein and Mrs Abram Root.

Members completed plans for packing a Christmas box for their adopted Korean child They will include a present for every member of the family—four children, a mother and an invalid father.

Mrs White, Mrs Newcomer, Mrs Root and Mrs Herbert Rowe have volunteered to process Christmas seals for the Tuberculosis society of Lancaster County.

Award Program Announced By Utility Co.

Pennsylvania Power and Light company has announced the continuance of its program for educationl assistance under which 13 scholarships will be offered to young men and women whose parents are P. P. & L. customers

Three undergraduate scholarships will be awarded on the same basis as above to be used for study at the Penn State University's College of Agriculture. The annual amount is $200, payable to the University on behalf of the grantee

The company's program of educational assistance in the field of agriculture education is in line with its announcement that agriculture is firmly linked with the progress and prosperity of this area's general economy and that there is a continuing need for high calibre farm leadership

Clayton Erb Is Given Award

Clayton B. Erb, Landisville, has been named recipient of the first Hoffman Seed Man award.

In presenting the award, the company said, "This first award must go to Clayton B. Erb for giving the most years of service to his legion of farm-friends and to the company—he is truly the 'number one man'."

Erb formed his association with the Hoffman seed firm in the early 1900's when he bacame one of the first producers of seed wheat for the originator of the seed house. The Hoffman firm was formed in 1899, and since the Erb farm was nearby, the association was a natural one.

Erb began work for Hoffman in the 1920's and has been assiciated with the company for the 40 years since.

Today at 80 years of age, Erb is still active in the sales organization of the seed firm and has a regular territory which he covers as he has always done. He says in his job 65 is just another birthday.

CLAYTON B. ERB, left, accepts the first outstanding seedsman award from William F. Hoffman, president of A. H Hoffman, Inc. seed firm of Landisville Erb has been with the company since the early 1920's Before that time he produced seed wheat on his farm for the company Erb was the first employee to be so honored by the company

● Feeder Calf

(From page 1)

The feeder calf sale committee, in order to stimulate interest in the purchase of high quality calves for show purposes, is offering prize money for any calf purchased at this sale and placing in the first 15 places at the Garden Spot Baby Beef Show at the stockyards next August Awards of $25 will be given for calves in the first five placings and awards of $10 will be given for sixth to 15th place. A good number of fancy calves will be sold separately to encourage purchases by youths for club purposes.

At the 1960 sale over 400 head of calves changed hands at an average price of 27 66 for steers and heifers One fancy calf crossed the block at $45 per CWT to top the sale

Over 400 head of purebred heifers and steers have been consigned again this year Abram Diffenbach will be auctioneer

New Ful-O-Pep Pig Starter is

GUARANTEED PALATABLE

or your money back

The sooner little pigs eat and the more they eat the more they gain. With Ful-O-Pep Pig Starter, you can expect a pound of gain on only 1.4 to 1.6 lbs. of feed. That's why palatability is so important—pigs eat more and make greater gains at a time when those gains cost you less.

Try a bag of new Ful-O-Pep Pig Starter today and see if it isn't the most palatable Pig Starter you can buy. If your pigs don't prefer it, return the unused portion and we'll give you your money back.

CORN ON THE J. ZEIGLER HESS FARM at Quarryville R3 is dried by forced hot air before being stored for the winter. After being dumped into the hopper, far left, by the truck, the shelled corn is augered up to the storage bin It feeds by gravity into the batch drier where the moisture content is reduced to about 12 per cent From the drier the grain goes to the storage bins in the foreground Hess, on the platform above the drier, processed the corn about 50 acres of his own plus about 10,000 bushels for a cooperative last year. Hess believes much corn is going into storage too wet. —L. F. Photo

Corn Yield

(From page 1)

acres, but on one plot he disced after plowing and on another plot he worked the ground tharoughly as he had always done All the corn was planted with a new planter rigged to put the seed in the tractor wheel track

We change slowly, Hess said last spring after the corn was up and growing. He planned to cultivate all his corn once, Although it had all been sprayed with a herbicide.

To satisfy his own curiosity, Hess left about two acres untouched with the cultivator. Weed control was not a serious problem, but there were some weeds in the plot. "I believe you can do as much damage as good with the cultivator. "Hess said, "If you can control the weeds, I believe you can do without cultivting."

Now that the results are in what has he found out?

His crop will average over 132 bushels per acre on all plots. Wheel track planting worked well this year, and he will continue it next year There was no measurable difference in yield on the areas which were cultivated and uncu.tivated. Minimum cultivation saved many hours of labor, many trips across the field, and a lot of wear and tear on machinery.

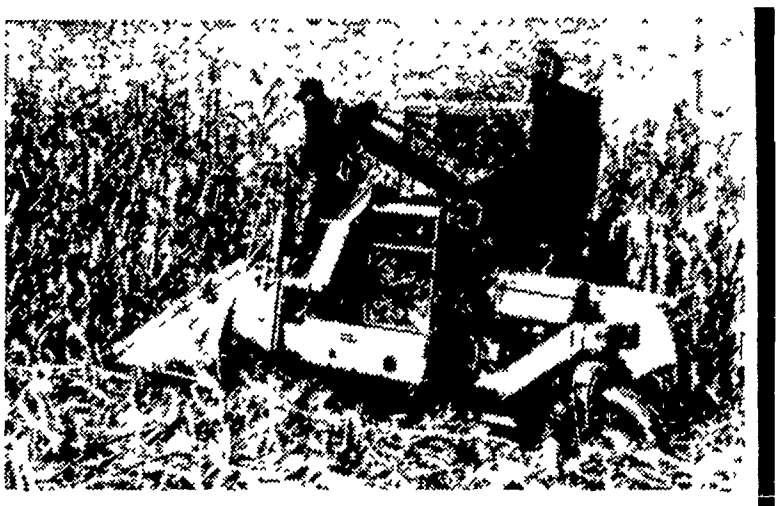
At the spring meeting in the corn field, farmers questioned whether picking might be a problem on the uneven ground left by the plow-plant method. "This is a good year for picking, but we have not had any more trouble where we did not cultivate than where we did cultivate." Hess said. Hess uses a picker-sheller and feels he was getting a good clean job of harvesting this week.

After the corn is shelled, it is hauled by dump truck to a dryer where gas fire heated air is used to reduce the moisture content to a bout 12 per cent for storage

Hess believes the quality of corn possible with the drier makes drying profitable. In addition to the corn on his own farm, he will dry several thousand bushels on a contract basis for a cooperative

Wheeltrack planting will be a part of the corn growing program on the Hess farm in 1962. As for minimum tillage, if weed control with chemicals is satisfactory the corn will not be cultivated after it is up, but Hess wants to be able to cultivate if weeds or grass threaten to compete with the crop.

If he does maintain good weed control, he stands totrips over his corn ground cut out a lot of repeated next year.



CORN LEAVES THIS FIELD shelled and ready for the drier. Henry Hess, Quarryville R3, harvests corn with a picker-sheller on the poultry farm which he operates with his father. Zeigler Hess. The shelled corn is taken from the harvester by a dump truck and elevated to a storage b n over a batch drier. After the moisture content of the corn is down to about 12 per cent, the grain is elevated into permanent storage for use in poultry feed. —L F. Photo

Local Firms Announce New Personnel

Two local firms recently announced additions of personnel to their staffs John W. Eshleman and Sons of Lancaster has employed Carey L Quarles, University Park as manager of the Red Rose Research Center. Edwin Wallis and Sons, Liverpool, Pa. announce the appointment of John H Herr, Jr. of Annville and David E. Lauver, Lancaster, as sales and service councilors for the leghorn hatchery firm.

Quarles, a native of Buchanan, Virginia, is a graduate of Virginia Polytechnic Institute, Blacksburg, Virginia, where he received his Bachelor of Science degree in poultry husbandry. During the past year he was a graduate assistant in the poultry department of Pennsylvania State University and completed his work for a Master of Science degree

JOHN H. HERR, JR.

DAVID E. LAUVER

CAREY L. QUARLES

His duties at the Red Rose Research Center will include the supervision and analysis of feed developments, testing, and compilation of technical sales information

Lauver has been associated with the Poultry industry in Central Penna for the past 5 years Prior to this work he was in the sales division of Sears Roebuck, Co

Lauver was born and reared on a Juniata County farm, Mifflintown, R D, Pa He will represent Wallis and Sons Hatchery, selling baby chicks in York, Cumberland, and Adams counties.

Mr and Mrs Lauver and their son, David B, age 3, live at 334 Ruby St, Lancaster, Pa

Herr has been associated with Florin Farms, Mt Joy, for the past 3½ years in their sales and service division Prior to that he served two years in the Chemical Corps, U S Army He was born and reared on a Lebanon County farm He won top honors in the Lebanon county plowing contest in 1954, 1956 and 1957 In 1954 he

(Turn to page 10)

WHEN YOU ARE READY TO HOUSE YOUR PULLETS!

Pullets moved from range to the laying house find themselves in an entirely new environment, "Strange Quarters", as far as they are concerned.

1. Supply extra fountains around the floor and on the roosts, also feeders.

Some of the birds which looked so nice when you brought them in will have difficulty finding feed and water at first and get uneven and lose some weight unless feed and water consumption is kept at a high level by extra waterers and feeders.

2. Feed #33 EARLY BIRD POULTRY FITTING RATION in hoppers first 2 weeks instead of scratch.

When birds are brought in off range lack of exercise may cause some constipation. Fitting ration helps keep comb color and vigor.

3. When changing to scratch don't have your litter too deep in the house at first.

Scratch in deep litter when pullets are housed is apt to cause a decrease in feed consumption the first few days. Put some scratch in the feeders as well as on the floor at the start.

When chickens are used to their quarters after the first few weeks build up litter gradually to desired depth.

4. If your chickens start to lay on range DO NOT FORGET Oystershells or Calcite Grit.

Without these the birds will draw on her calcium reserve in the bone structure to make the shells. This will eventually result in some weak and poor birds and poor shell quality.

5. Early Bird All Mash Ration or Early Bird Egg Mash and Grain will help you to efficient LOW COST production of quality eggs with just the right yolk color.

If we can be of help to you in any poultry problem, please call your Miller & Bushong representative or dial EXpress 2-2145 direct.

NOTE . . .

The care you give your birds during the first month they are housed will largely determine how profitable your flock will be during its laying year.

For the Farm Wife and Family

Rice Is Quick And Easy

By Mrs. Richard C. Spence

Rice is a boon for any menu because it it is so quick and easy to cook. It takes only about 15 minutes to cook to white fluffy perfection.

For those who like to plan ahead, a double portion of rice may be cooked at one time for the meal at hand, and half refrigerated for later use.

Rice can't be "topped" as an all-around food—use it as a vegetable, casserole ingredient or dessert Let us show you here how you can use rice in your menus. Don't forget, too, that rice is an economy food

In Golden Rice Beefburger Pie, a mixture of ground beef and mushrooms gets a golden crust of rice speckled with parsley and pimiento for an easy-to-make one dish meal With this casserole you might like to serve a vegetable salad and for dessert, cake or brownies with fresh fruit.

GOLDEN RICE BEEFBURGER PIE

2 tablespoons butter or margarine
¾ cup chopped celery
¾ cup chopped onions
½ cup chopped green pepper
1 pound ground beef
⅔ cup tomato sauce
1 tablespoon barbecue sauce
1 4-oz. can sliced mushrooms
1 teaspoon salt
¼ teaspoon pepper
Golden Rice*

Melt butter in skillet. Add celery, onions, & green pepper and saute until tender but not brown. Remove from heat Add ground meat and remaining ingredients; mix well. Turn into a 1½ quart baking pan and top with Golden Rice*. Cover and bake at 400 degrees for 30 minutes Makes 6 servings.

GOLDEN RICE

2 cups cooked rice (cook in beef broth or bouillon)
2 tablespoons minced parsley
2 tablespoons pimento, diced
1 tablespoon prepared mustard
2 eggs, beaten
½ teaspoon salt
Dash of pepper

Mix together all ingredients

Curried Lamb and Rice has long been one of the world's favorite dishes and here it is in a bright new treatment—superb soup that is designed as a satisfying main course.

CURRIED LAMB & RICE

¾ pound boneless lamb, cut in small cubes
1 apple, chopped
1 cup chopped celery
½ cup chopped onion
3 tablespoons butter or margarine
3 tablespoons flour
2 teaspoons curry powder
1½ qts. chicken broth
½ cup uncooked rice
½ teaspoon salt
Dash of pepper
Thin lemon slices
Shredded Coconut

In a large saucepan, brown lamb, apple, celery and onion in butter or margarine. Stir in flour and curry powder, then chicken broth. Add rice, Salt and pepper. Bring to a boil. Stir. Cover. Reduce heat and simmer 30 minutes. Serve with thin slices of lemon or shredded coconut. Makes 6 to 8 servings

NOTE: This soup has the consistency of a stew. Served with your favorite salad and dessert, it is a complete meal

This wonderful tasting main dish uses succulent veal, tomato sauce, onions and sour cream. It's a marvelous combination of foods which brings out the best in each one. The meat and sauce are served over light fluffy rice pilaf made by heating uncooked rice in fat then cooking it in water. It's all quickly fixed and the browned meat in the tomato sauce is extra tasty topped with generous spoonfuls of sour cream.

VEAL IN TOMATO SAUCE

About 1½ pounds veal steak or cutlets ¼ inch thick (enough lean meat for 5-6 servings)
Flour
2 tablespoons cooking fat
2 tablespoons butter or margarine
1¼ cups uncooked write rice
1 teaspoon salt
2½ cups water
1½ teaspoons salt
⅛ teaspoon black pepper
1 clove garlic, minced
1 teaspoon Worcestershire sauce
1 8-ounce can tomato sauce
½ cup water
12 thin onion slices
½ pint dairy sour cream
Parsley for garnish, if desired

Remove any bones form veal. Cut into 5 to 6 serving pieces Pound some flour into both sides of the meat Melt the 2 tablespoons of cooking fat in a very large skillet or Dutch oven. Add the meat and brown slowly on both sides. Add fat if necessary

While the meat browns, melt the 2 tablespoons butter or margarine in a 2 qt. saucepan. Add the rice. Cook slowly, stirring occasionally, until the rice turns a yellowish color Slowly add the 1 teaspoon salt and 2½ cups water. Bring to a vigorous boil over a high heat. Turn the heat down low. Cover. Simmer over this low heat 14 minutes. Remove the saucepan from the heat but leave the lid on until ready to serve at least 10 minutes.

After the meat browns, sprinkle with the 1½ teaspoons salt and black pepper Add the garlic, Worcestershire sauce, tomato sauce and ½ cup water. Place the onion slices over the meat. Cover and simmer about 25 minutes or until the meat and onions are tender. Add water if the mixture begins to cook dry or if a thinner gravy is desired.

Just before serving, spread the sour cream over each of the meat pieces in the skillet. Cover. Turn heat

PP&L considers it a privilege to help deserving young men and women in Central Eastern Pennsylvania in achieving a college education and, at the same time, to render assistance to area colleges and universities

down very low. Do not simmer. Heat 5 minutes. To serve, spread the rice over a hot platter and top with the veal. Spoon the sauce over the rice. Garnish with parsley.

* * *

Rows of colorful, luscious fruit grace the top of this "open face" dessert. There are dark sweet cherries, succulent white pears, golden apricots and peaches and plump green figs. Convenient canned fruits are used so this is a dessert you can whip up in a hurry.

FRUIT SPARKLE

1 cup uncooked white rice
2 cups water
1 teaspoon salt
1 cup milk
½ cup granulated sugar
1¼ cups light brown sugar, firmly packed
1 can (1pound - 1 ounce) figs, drained
1 can (1pound - 1 ounce) sliced peaches, drained
1 can (1pound - 1 ounce) pitted dark cherries. drained.
1 can (1pound - 1 ounce) pear halves, drained
1 can (1pound - 1 ounce) apricot halves, drained

Put the rice, water & salt into a 2-quart saucepan. Bring to a vigorous boil. Turn heat down. Cover. Simmer 14 minutes. Remove the saucepan from the heat but leave the lid on 10 to 15 minutes. Spread the rice over a greased shallow baking dish about 8"x12"x2". Pour ½ cup of the milk over the rice. Sprinkle with granulated sugar and half of the brown sugar. Place pears in the center, overlapping the halves.

Make two rows of figs, one at each end, and two rows of the cherries placing them next to the figs. Add peaches and apricots. Pour the remaining ½ cup milk over the fruit. Sprinkle with the rest of the brown sugar. Bake in a 350 degree oven about 40 minutes or until most of the liquid is absorbed. Spoon milk over any brown sugar which does not dissolve. Serve warm with whipped cream or vanilla ice cream. This recipe makes 8 to 10 servings.

For you calorie counters here are two desserts that are easy on your calorie budget.

RICE RAISIN PUDDING

2 envelopes low calorie vanila pudding
2 cups skim milk
2 cups cooked rice
⅓ cup raisins
1 teospoon vanilla

Prepare pudding with skim milk as package directs While hot, stir in rice, raisins and vanilla. Chill. This makes 4 servings.

* * *

GOLDEN AMBROSIA RICE

2 cups cold cooked rice
1 banana, diced
1 orange, peeled and diced
½ cup miniature marshmallaws
1 envelope Dessert Topping Mix
½ cup skim milk

Combine rice, banana, orange and marshmallows Make up Dessert Topping Mix according to directions on the package substituting skim milk for milk. Fold into rice mixture. Chill. Makes 4 to 6 servings

* * *

Another dish for those on a low fat or low cholesterol diet—

SEAFOOD GUMBO

1 can (13¾ oz) chicken broth
½ cup clam broth
½ can (7-ounce) crab meat
¼ pound fish fillets, cut in 1-inch pieces
1 tomato chopped
⅓ cup okra, (optional)
⅓ cup diced carrots
2 tablespoons chopped onion
Salt and pepper
1 cup cooked rice

Combine broth, clam broth, crab meat, fish, tomato, okra, carrots and onion. Brong to a boil. Cover and simmer 15 minutes. Season to taste with salt and pepper. Serve in bowls. Top with scoops of rise. Makes 4 servings.

POINSETTIAS

By Mrs. R. C. Spence

If you've saved your poincettia plant from Christmas and would like to have it brighten the house again this winter, it's important that you understand its light requ rements.

The poinsettia develops its bloom when days are short and nights are long To help your poinsettia bloom this winter, keep it in a room not used at night. Begin the short days Oct 5 and continue until Thanksgiving. Put it in the dark at 5 p m. and remove it at 8 a m each day Even short periods of exposure to night lights will interfere with blooming. When the plant begins to bloom. you will, of course, want to display it in your lighted rooms. At this stage, the light will make no differ-

...OL... WHAT DIRECTION?

nnsylvania Power & Light Company's pro-am of educational assistance could help swer that question for some deserving young an or woman.

Perhaps you have a youngster—a high hool senior—who will be eligible for college in 62. Or perhaps you know of some other ung person who will soon be ready to enroll a Central Eastern Pennsylvania college or iversity.

If you do, be sure to tell them about PP&L's o programs for educational assistance: the neral Scholarship Program, under which ten olarships are available each year to young ople whose parents are customers of PP&L; d, the Agricultural Scholarship Program, der which three scholarships are available h year on the same basis as above.

Each General Scholarship winner will have 0 paid toward his or her tuition each year, erein, each grantee may choose to attend any e of the 15 Central Eastern Pennsylvania leges or universities listed below, and may ct any four-year college course which leads a baccalaureate degree.

In addition to the amount payable on behalf the grantee, PP&L will pay a like amount to the college or university which the grantee is attending for its use in whatever manner the institution may feel will contribute most toward the realization of worthy educational objectives.

Under the Agricultural Scholarship Program, three undergraduate scholarships will be awarded to be used for study at The Pennsylvania State University's College of Agriculture. The annual amount is $200 payable to the University on behalf of the grantee.

Have them ask at their school or nearest PP&L office for a copy of either or both of the Company's scholarship brochures. Their high school principal or guidance counselor will be happy to discuss the program with them.

Remember—a college education opens the door to a better job and a better way of life. It is an investment in a young person's future that continues to pay dividends.

Best Food Buys

Fall Color Adds Appetite Appeal

Have you been admiring the colorful scenery of our Pennsylvania Countryside and wishing you could bring some of those colors indoors for use in home decorations? Wait no longer, says Tom Piper, our Penn State Extension Marketing Agent, because local markets have ample supplies of Indian corn, red and yellow apples, pumpkins, squash and decorative gourds

Squash and pumpkins can add color and zest to autumn meals too The acorn and butternut squash are in plentiful supply and will add pleasing variety to the menu. Pick a pumpkin too, a small one for pies or a large one for a jack-o-lantern.

Plentiful apples—the Jonathan, Red and Golden Delicious, Winesap and Grimes Golden varieties, top the list of good fruit buys. Prices are about as low as expected for the season because storage costs are not a factor at this early point Mellow apples are best held at cool room temperature until ready to eat Sweet cider is an item in plentiful supply too

Lower prices are in prospect for citrus as supplies increase from Florida Best buys from the standpoint of consumer satisfaction would include the red-fleshed grapefruit, Navel oranges and the Hamlin and Parson Brown juice varieties Banana prices are up over last week Early shipments of Emporer grapes are beginning to replace the dwindling Tokay variety. There are several other varieties of table grapes available at seasonal low prices

Good vegetable buys include cabbage, carrots, eastern celery, repacked tomatoes, cucumbers, lettuce and leafy greens Cauliflower, retarded by heat and hurricane damage in early season, has shown marked improvement and prices are reasonable

Potaoes continue as a very good buy with wholesale prices the lowest in many years A big meeting in Harrisburg last week of over 100 grower representatives from all eastern states recommended to government officials that surplus purchases be made for distribution to the needy and for the school-lunch program, and that quotas for limiting production should be studied before next year.

Wholesale pork prices have been moving steadily lower for the past three weeks This should provide some lower retail prices in weeks ahead Look for chuck roasts of beef, fresh pork picnics and pork loins to appear as promotional items this week Turkeys and stewing hens are in seasonally heavy supply and continue as economical meat choices Small and medium sized eggs continue to rate a good protein value

● Personnel

was 4th place winner in the State Plowing - 1956 - 5th place winner and 1957 moved into second place

Herr graduated from the Hershey high school and attended North Carolina State College, Raleigh, N Carolina. He will represent the firm in Lebanon, Berks and Lancaster County areas.

● Corn Plots

(From page 1)

heighth of stalk and resistance to stalk and root rot.

James Eakin, agronomist from the Pennsylvania State University, will be at both plots to explain the merits of the hybrids as he has seen them perform in various demonstrations around the state this fall He will also answer questions on corn growing

The first demonstration will begin at 8 30 a m on Tuesday, October 28 on the farm of Glenn Brubaker, Lime Spring Farm, Running Pump Road, between the Marietta and Columbia Pikes

At the same hour on the following day, the second of the two plots will be husked on the farm of Glenn Wissler, northeast of Clay on the road to Gerlach's store.

"Bring your husking pegs and give us a hand in harvesting the plots" Lueck invited.

● Rice

(From page 9)

ence.

The bloom period will last about 10 days or so, then the red leaves—which many people think is the flower—will fall off and the plant will again become dormant

A poinsettia also drops its leaves if its roots are congested If the leaves of your plant are already falling, it probably needs to be replanted in a larger pot.

WINNERS OF THE LANCASTER COUNTY 4-H Dairy club project book contest are, L to R, Paul Trimble, Quarryville R1, Holstein winner; Phyllis Landis, Oak View Road, Lancaster, Jersey winner; Mary Ellen Mumma, Manheim R1, Guernsey winner, and R Edwin Harnish, Christiana R1, Ayrshire winner. —L. F. Photo

Cheese, cottage cheese and ice cream and other frozen desserts were among America's favorite foods during 1960 The average consumer ate 8 4 pounds of cheese, to set a new record. The same average American maintained records from the year before by using 5.6 pounds of cottage cheese and 20.0 qts of ice cream and other frozen dairy foods.

The average American satisfied a record-high appetite for cheese during 1960, by eating 8 4 pounds of dairy products.

Dairy Club Presidents Are All Project Winners

Two Lancaster County 4-H dairy club members repeated as champions in project competition when the book scores were totaled at the annual banquet of the combined clubs last Friday night.

Paul Trimble, president of the county Holstein club and Mary Ellen Mumma, president of the Guernsey club turned in high project book scores for the second consecutive year.

Trimble, son of Mr. and Mrs Daniel' Trimble, Quarryville R1, finished the project year with a total score of 97 6 to win the Holstein breed competition Miss Mumma, daughter of Mr and Mrs Harry Mumma, of Manheim R1, scored 97 2 points out of a possible 100 in the Guernsey club

R Edwin Harnish, Christiana R1, son of Mr and Mrs. Ralph E. Harnish, turned in the highest score of any club members when his Ayrshire project record totaled 98 5 He is the president of the county Ayrshire-Jersey club

High score in the Jersey breed was won by Miss Phyllis Landis, daughter of Mr. and Mrs Raymond Landis, of 172 Oak View Road, Lancaster

Awards for breed type championship, fitting and showmanship at the county dairy club roundups in August, were made before the 200 members and parents at the Strasburg fire hall.

Entertainment was furnished by a reed choir from Solanco High School with Mr. Ralph Downey conducting. Darvin Boyd, Ephrata R1, now a student at Delaware Valley College of Agriculture, was the featured speaker. He explained the four points of the 4-H club symbol

Project score winners were as follows

AYRSHIRE

1, R Edwin Harnish; 2, Judy Ann Flory, Lititz R2; 3, Marilyn Harnish, Quarryville R2; 4, Joyce Kreider, Quarryville R1; 5, James Esbenshade, Quarryville R2; 6, Gerald Kreider, Quarryville R1, 7, Carol Ann Krantz of New Providence R1; 8, Linda Eshleman, Elizabethtown R1; 9, George Clark, of Lititz R1, 10, Dale Kreider, Quarryville R1

JERSEY

1, Phyllis Landis, 2, Lucille Kreider, Drumore, 3, J. Marvin Herr, Holtwood R1; 4, Jean Kreider, Quarryville R1

Poultrymen

(From page 1)

disposal of the present building."

During the discussion Poultry Association member, Lewis Mortensen asked what sort of committment the Agriculture Center board expected from the poultrymen

After reviewing a list of six recommendations drawn up at a joint meeting of the Poultry Association directors and the Agriculture Center board, Levi Brubaker, finance committee chairman for the Agriculture Center said the Poultrymen would have no financial obligation above rental of facilities in the proposed building. He reminded poultrymen, however, that they do have a moral obligation to the contributors toward the present Poultry Center.

At present time, the Poultry Center, constructed in 1957 at an approximate cost of $67,000, carries a mortgage of slightly more than $18,000 While the Center has been operating at a profit it was pointed out that recent developments in the poultry industry and declining numbers of poultry listed on the exchange sale have cut the margins and made reduction of the building debt extremely slow.

Members Thursday night expressed belief that the best interests of the poultry as well as agriculture throughout the county could best be served if operations were moved to the central location.

The Agriculture Center will be built on a 10 acre plot of ground just off Arcadia Rd. and the 230 by-pass. The plot and $100,000 in cash were pledged by an anonomous donor for use in constructing such a center. A member of the poultrymen's Association said Thursday night, "With such a start, the center will be built, and we should be a part of it."

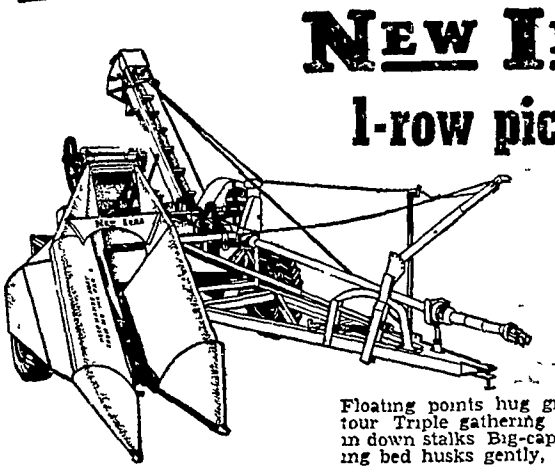
PICKS CLEANEST · HUSKS CLEANEST · GETS MORE DOWN CORN

NEW IDEA 1-row picker



Floating points hug ground contour Triple gathering chains pull in down stalks Big-capacity husking bed husks gently, thoroughly.

Does the best picking job... Easiest and safest to use, too!

- 30% fewer grease points; bank of grease fittings for husking bed.
- Convenient lever to space snapping rolls, for easier field adjustments, safer operation.
- Permanently shielded PTO shaft; snap-on universal joint.
- Raise and lower snapping unit by easy-to-reach spring loaded hand lift or by hydraulic cylinder.
- Adjustable hitch for best trailing; stronger wagon hitch permits heavier loads.

Plans Announced

USDA Maps Swine Bangs Plan

A new phase of the brucellosis eradication program —an intensified effort to eradicate swine brucellosis— officially gets underway today, the U.S. Department of Agriculture announced.

The nationwide swine bru cellosis eradication program will be carried out jointly by the States and USDA.

Three good reasons for the program were cited by Dr. C. K Mingle, who heads brucellosis eradication work for USDA's Agricultural Research Service. "First of all" he pointed out, "swine brucellosis costs the swine industry about $10 million a year. Second this disease presents a threat of cross-infection to cattle Third— and highly important—it is a serious hazard to human health"

In the past, Dr. Mingle ex plained, most cases of human brucellosis, or undulant fever, were contracted from cattle infected with the bovine form of brucellosis. "But now" he said, "the main source of human infection is diseased hogs" Last year, for instance, 65 per cent of all the reported cases of human brucellosis were thought to be of swine origin—compared to 40 per cent only three years ago"' (In 1959—the last year for which complete figures were available—there were 892 cases of human brucellosis.)

"This points up the progress being made in eradicating brucellosis in cattle," he continued, "but it also indicates the need for doing something more about brucellosis in swine."

The first stage of this intensified swine brucellosis program is based on the "validation" of individual swine herds as brucellosis-free. Validation is achieved by folowing procedures recommended by the U. S. Livestock Sanitary Association and approved by USDA and cooperating States. The herds are validated for one year after all adult animals pass two consecutive negative blood tests. When a herd qualifies, the owner is supplied with an appropriate sign bearing the symbol of validation — identifying his herd as a source of brucellosis-free hogs

Dr. Mingle pointed out that such a herd will be known as a "Validated Brucellosis-Free Herd." This new term replaces the desig nation "Certified Brucellosis Free Swine Herd," which has been used in various State swine brucellosis programs.

"Reason for the change," Dr. Mingle explained, "is that hog producers generally associate the term 'certified" with certification achieved in production testing programs of purebred swine associations — 'Certified Litter' and 'Certified Meat Sire' for instance. The word 'validated' is being used in the swine brucellosis program to avoid confusion.

Eventual eradication of the disease in all swine herds is the goal of the new program, Dr. Mingle said.

FHA Program Is Broadened

Farmers are borrowing and using more dollars today so that the families of the nation may be assured of an adequate food supply in the years ahead, Richard W. Hoover, Farmers Home Administrration County Supervisor said today.

"Food is a bargain today. Only twenty percent of the consumer's income goes for food. Most of the people in other countries spend half of their income for food. However, to maintain the efficient production that makes food such a bargain the farmer needs to pour increasing amounts of capital into his operations," he said.

The average investment per farm has climbed from $6,000 to $42,000 since 1940 a seven-fold increase, Hoover pointed out. Farmers are using the funds to acquire the machinery, fertilizer, land and other essentials for efficient farm operations.

Recent legislation passed by Congress has raised the maximum amount that a farmer can borrow from the Farmers Home Administration from $20,000 to $35,000

"The increase in loan limits reflects the growth need for agricultural capital," Hoover said. "The technological revolution in agriculture has greatly increased the amount of capital farmers have to invest in their operations. Many young farmers who are just getting started and established farmers who need to make major adjustments in their operations will benefit. Urban families will benefit, too, for every dollar wisely invested in our farms strengthens our ability to produce the food that is so essential to our survival."

The Farmers Home Administration makes loans only to farmers who are unable to obtain needed credit from other lenders at the time they apply for the loan As soon as borrowers progress to a point where they are able to obtain credit from convential sources, they graduate to those sources.
